### ABSTRACT

A control module includes a control circuit unit and a wiring unit contained between a cover and a base. The wiring unit has a resin molded part formed by resin-molding nearly central portions of bus bars. The base is shaped to be in contact with the cover when they are fitted to each other, and has protrusions each formed to position between the adjacent bus bars in the flexible region. Contact portions between the cover and the protrusions of the base are fixedly bonded to each other.
